

Girly Shoe Tags

Print pattern. Cut the pattern pieces out. Use them to cut 2 each from wool or wool blend felt if you want to make two tags, but only cut 1 each if you want to make one tag. For each tag, stack one each of the flower and leaf pieces as shown and tack together with dots of fabric glue. Add the button and use floss or thread to sew all the layers together securely and knot under the flower. Then use strong thread to hand sew the tag securely to the webbing or strap of the shoe.
